# 2016

# Plan Competition

21 - 25 February 2016

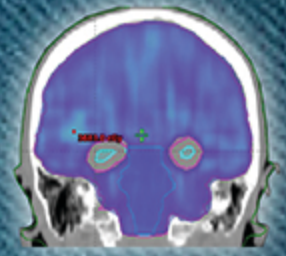

accept  
the  
Challenge

Be the strongest link in the radiotherapy chain

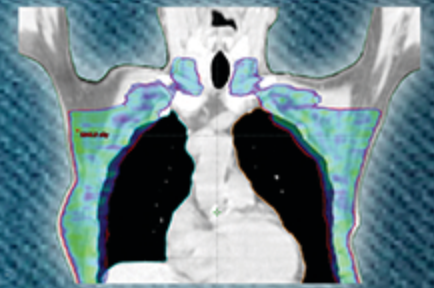

## What is it about?

It is a national/international competition for individuals to showcase their treatment planning skills on a clinical case. The case will be judged based on target coverage and organ at risk sparing.

## Why compete?

Initiating a competition is one way to get the best out of the professionals, it will stimulate planners to reach the maximum of their skills and also the maximum of what their TPS is capable of achieving.

## What are the benefits?

Beyond personal knowledge and enhanced skills, the cancer patient will have the best quality plans

## Why this competition is a win-win opportunity for ALL parties?

A live webinar will be held to provide all participants (or any interested planners) with the opportunity to interact with the top planners in the competition, and discuss the strategies that enabled them to achieve high quality plans

## Who can participate?

All planners from Saudi Arabia, Middle East, and the rest of the world.

*The ultimate winner of this competition is our cancer patient*
